19. Bovine growth hormone produced by the method
of claim 18.

Remarks

This application is a Rule 60 continuation of U.S. Serial No. 07/480,745 filed 15 February 1990 and still pending.

Submitted herewith is a copy of the specification as originally filed in the great great grandparent application 06/181,348 filed 26 August 1980. All of the handwritten notations in this copy are those of the inventors. The Declaration filed 4 May 1989 along with the grandparent application herein by Miller, Martial and Baxter (copy attached) identifies the particular alterations (see intermediate paragraph on page 1) and verifies that these alterations were made prior to executing the original oath; therefore, it is believed this Declaration is sufficient.

Additional markings, not initialled or dated, included in the copy of the application submitted in connection with the grandparent, U.S. Serial No. 07/090,937, filed 28 August 1987 (attached Exhibit A), were review notes of the prosecuting attorney and a copy of the specification which included them was erroneously used as a basis for submission in the grandparent.

The foregoing items were intended to dispose of the informalities set forth in the Office action in the grandparent mailed 15 August 1989 (copy attached).

In the parent application, apparently, the Examiner did not consider the foregoing items to be dispositive of all informalities. In an Office action mailed 21 May 1990, additional objections were raised. Declarations in response to these objections were submitted by the inventors on 21 November 1990; copies of these Declarations are also included.

Applicants believe this disposes of any remaining informalities, and that this submission is free of these problems. If this is not the case, a telephone call to the undersigned attorney is respectfully requested.

Respectfully submitted,

By: Kate H. Murashige
